About This Game

VR Dream Match Baseball is experience to challenge Big League pitchers.

Challenge a pro's fastballs and breaking balls as a batter and catcher! With true hitting/catching sensation. You can experience a real pitcher's balls in a big league baseball stadium with realistic sensation as a catcher or batter. You can shuffle pitch types from the menu or button operation. You can also enlarge the size of the bat or ball so that you can hit the ball more easily – a feature you could enjoy only in the digital world.

☑ Takes place in a stadium setting creating a true sensation.

☑ Catch a 102 miles/h straight ball ! Do you have the courage to catch it?

☑ Aim for home run ! You can experience pro pitchers' various pitch types, such as straight ball, curveball, splitter, etc.

☑ Data display: Catching results, batting results, results per ball and reaching distance

☑ When you hit a home run, grand fireworks and great cheers will bless you.

Very cute re-sprite, nice to mix things up from the traditional buildings. Because \$2 is a bit expensive for what you get, I'd only recommend buying it if you have some spare change in your Steam Wallet, and you use Banana Farms every game (which you should).. sign of good things to come from the developer. >first time playing a bullet hell
>goes on the hardest difficulty because why not
>somehow does better than on the easiest difficulty
>gets 1st on the leaderboard of pre-set scores
mmm yes. Relaxing and enjoyable at times but laggy, and it didn't hold my attention for very long. Left it running for the trading cards.. good old game, sadly it tends to crash. The Tape is short, yes, but a very nice psychological horror experience. The VHS like video effect and fitting creepy music make the atmosphere really unsettling, in a good way for a horror title. Each little chapter is different with a tiny puzzle you need to figure out to advance. Nothing too difficult, plus the game has nice checkpoints in case you fail.

If you like to feel uneasy and a bit scared for about an hour, get this game when it's on sale.. Before this, simply I didn't want to buy anymore DLC in general. But of course those \u2665\u2665\u2665\u2665\u2665\u2665s at Overkill must've hired the NSA to figure out that I have a hardon for MG42s and that policy went right out the window. *polishes MG42*. I bought this game a while back, and finally got into playing it. I'm about half way done with it now, and all I can say is wow! The gameplay is fun, until you manage to get yourself stuck in an area where avoiding damage every few steps is nearly impossible. I personally think the areas with all the spikes shooting through the walls and having to jump from each one to get to the top just sucks. Also, I like the wall climbing ability, but not while I'm avoiding boomerangs from skeletons on every frickin side of me, and all I want is this stupid fur ball to jump down the stinkin hole! No teleports either, at least not yet. I feel like I spend half my game time just going back and forth, repeatedly dying left and right!

I only recommend this game if you have the patience to do things over and over, again and again.

The key doesn't work. Capcom support is worst than♥♥♥♥♥♥♥♥ If you buy this game you can't play it, but the pirates can. Kudos to Capcom

UPDATE

Now in Windows 10 everything works fine the game is small and pretty good. The negative review stays for Capcom and Securom.. Be Careful it's critical error.

My PC sytem have 16G Main Rand and Gforce 1050Ti..
but, always OOM Error occur!

I Have another Toposim like Korea...Taiwan..V West Europe...etc.
These DLS is work well.

but South America....Does' work.....

.....

Note: USA Mountain West also Error Program... be careful

If you perfer High Graphic Settin in FSX....South America and US Mountain West couldn't load.... I don't mind walk simulators or even very short ones, if they are good, but this one is not.

Besides the contrived story that a 12 year old could come up with and write, there are also technical issues with the game that there is no excuse for. For example, there is no in-game support option for 4k, even though Unreal engine definitely supports this, thus is simply a matter that the ""devs"" did not allow to be selected.

. Don't be confused if someone compares this to The Room. Riddlord is Hard. Granted, some of the puzzles are just fine but some are mind altering confusions.

To give you an idea, I had to look at a walk-through for one of the puzzles and it was so....um....'much', I just uninstalled the game without finishing because it was just becoming a miserable chore rather than enjoyable.

But, for 5 bucks, give it a try if you enjoy really hard puzzles.

. Can only play one plane, a Sopwith Camel in Tobruk 1941? Very anachronistic. It does not reflect Dubai City, It is just a huge number of yellow lights. It does not include the most famous building in the world which is Burj Khalifa.
