## About This Game

**YEAH! JAM! FURYYYYYYY!**

Yeah Jam Fury: U, Me, Everybody! tests your speed and ingenuity in over 100 levels of smiley blocks and falls into the abyss. The mango lies in wait for you to reach out and grab it. And this trio of dudes is just about hungry enough to help you:

**Yeah**, AKA Mr. Fabricate, takes steady aim and fires blocks to set the path. He's good at controlling everything except his mouth.

**Jam**, AKA Mr. Navigate, is so full of energy he literally bounces off the walls. Good luck getting a handle on him.

**Fury**, AKA Mr. Eradicate, AKA *Lover Boy*, is the meat. He can't jump, but blocks break in his wake.

Switch dudes, take action, fall, respawn, fall, respawn, wait a moment, fall, respawn, and scale those blocks to **GET THAT MANGOOOOOO!**

No matter what genre of gaming you're used to, you'll find something enjoyable here. It has a certain comedic style making it lovable ^^.

Hardcore tower defence with great soundtrack and many different levels which requires different strategies and planning. Graphic is so-so, but it doesn't matter that much in TD. Gameplay is challenging and enjoyable - Molten Armor is a great game for hardcore TDs fans.. Poland is stronk!. People that enjoy anime already know what Ghost in the Shell is. I'm not going to sit here and explain what the plot is we all know its a classic. What i will go over are the movies features on steam. Steam offers 1080p streaming, Japanese language and english dub with subs for other languages. The movie also comes with a making of feature as a bonus. The stream over my Fios internet never stuttered once. All in all it was great quality. I recommend to all the OG anime fans looking to own a copy of this amazing anime.. awesome game. I personally enjoy hidden object games, so I found playing the title a real treat. Great art, beautiful music and some seriously difficult objects to find make this game a winner. On the other hand, the mini-game puzzles became repetitive and stale. I am not a fan of those.

For how recent it is, i've really loved this game. Hopefully later on there will be customisables other than the ski mask that aren't DLC, but I'm fine with the 3 base shadows and the ski mask for now. Definately addictive and fun. Love the game!. This isn't a good game, no matter how hard i tried to like it while it starts out promising it delivers so very little and while the Humor is mostly on point it sadly can't make you ignore the painfull excuse for gameplay this game has.

The Campaign largely consists of the same structure over and over again.

- Get a base going
- Get an army going
- take the objective

while there would be nothing wrong with that, seeing as many criticly acclaimed titles follow a similair pattern. If there was any variety at all, the whole campaign consits of you building the same base over and over and over again from scratch, to create the largely the same unit composition.

The game gets repedative very fast, making the whole 30 min of building the exact same base for the exact same units seem completly unnessesary.

Additonaly the game is plagued by bugs that can cause it to crash, i highly recommend against buying it.

. love this game cant wait to see more people playing

. Farming World is a game that I can't recommend because:

- it's not worth the money
- it is not unique
- it is repetitive
- it is boring
- there is almost no difference between the three game modes
- it is monotonous
- it has lots of bugs
- the graphics aren't that good
- the only good reason to install this game is for the trading cards. I think the negative review were pretty much all pre-patch.

I really like this game.

If you like spacr combat games, buy this, you won't be disappointed.. **DLC verdict: Don't get it OR Get it in the bundle with the base game**

#### Comment:

Adds a new playable character for multiplayer. However, the multiplayer is dead, thus making the DLC obsolete. But you CAN get it in the GOTY edition of the game, if you wish to do so.

If you liked this DLC review you can find more in my [Review Corner.. I wanted to love this app, because I love the concept. There are some things that make it unuseable for me, and I hope that it will improve or that someone else will do a better app.](#)

First: The soothing background sounds of waves crashing is cheesy at first, but you go with and it feel immersed in this place right up until it abruptly chops off at an ending upon looping itself. It's not only jarring, but it smacks of laziness in production quality.

Secondly: The core feature I want, drawing on a whiteboard, is not so great. The whiteboards can only be perpendicular to the ground, the colors are crappy and limited, and the eraser is unwieldy.

Thirdly: An annoyance that can be avoided, but just emits "poor production quality", switching between desert and island mode maintains your position during the swap, so it's easy to get stuck in a vertical mismatch between the maps and not be able to move around.

This is a great concept and it's a good start on whatever this app ends up being, but I don't feel good having paid even a

nominal modest charge for this software. I simply don't see myself using it in favor of better non-vr tools.. Unplayable
