Make sure that you download the file from a trustworthy source and install it on the computer you wish to use. The file is 8.2 GB in size and weighs in at 1.2GB. • Be sure to download the file to a reliable and updated drive. When you insert the download file into your computer, the program should be prompted to start automatically. While installing the software, it will warn you about possible conflicts with other programs. In case you see such a warning, just ignore it and the install will go through uneventfully. Make sure you do a full virus scan of your system after installation. If your system is a Windows 10 system, there is an option in the setup wizard to run an antivirus scan after the install. The antivirus program will search for Windows 10 viruses and apply the fix to your system. How to Play SOLIDWORKS in AVI format In case you have a PC with a NVIDIA graphics card, you will be asked to select a resolution in the setup wizard. At first, the program will request that you select the resolution that is required by the program. • Be sure to select the desired resolution that is required by the program (the resolution should be the same as the one specified in the options menu). Selecting the resolution can also be done later on by clicking on the Options button in the main program window. Once you select the desired resolution, click Next. • In the Choose directories to install application box, make sure that you type in the directory where the program is to be installed. Once you have selected the desired directory, click Next. • The last step in the installation is to select the language of the application and the format it will be installed in. Select the desired language from the drop-down menu and click Install. SOLIDWORKS in AVI format is now installed on your computer. You will be able to use the program without having to install it. However, you can do the installation yourself later on by clicking on the link in the URL box. How to Play SOLIDWORKS in QuickTime format In case you have a Mac with a NVIDIA graphics card, you will be asked to select the resolution required by the program. • Click on the Options button in the main program window. This will open a menu where you will be able to select the desired resolution required by the program. Make sure that the resolution is the same as the one 82157476af
